josephine

Skills

Programming Languages
C++, C

Frameworks
SDL, ImGui, libtcod, nholmann/json, GBDK

IDE Tools
CLion, VSCode, Visual Studio, PyCharm, JetBrains Rider, WebStorm

Game Engines
Unreal Engine 5, Godot, PICO-8, RenPy

Programming Concepts
OOP, Modern C++, STL, Data Structures and Algorithms, Memory Management, Design Patterns, Error Handling

Critical Thinking

Git/Github

Technical Writing
MKDocs, Documentation, API

Experience

Ubisoft — Remote
Programmer Mentee - Develop At Ubisoft — Nov 2025 – May 2026

- Selected from competitive, global applicant pool for AAA-studio programming mentorship.
- Under mentorship of senior Ubisoft engineers to develop C++ / gameplay-engine skills.
- Built GOAP and Utility AI systems in Unreal with Blueprint-configurable goals, actions, and scoring for designer-friendly behavior authoring.
- Implemented gameplay and UI systems including inventory, crafting, routines, object pooling, managers, inventory UI, crafting UI, and a hotbar system.

Independent Work — Remote
Plugin Development — May 2026 - Present

- Independently developed and published a free Unreal Engine plugin based on tooling techniques explored during the Ubisoft mentorship.
- Designed the plugin to be designer friendly and modular, with extensive documentation to make it easily comprehensible.
- Gained hands-on experience with Unreal Engine plugin architecture, and a newfound love and appreciation for reusable systems design through my independent development.

Fab Page

Education

Norwich University Of The Arts — Bachelor Of Science • Grade 2: 1
Games Development — September 2022 - July 2025

- Gained practical experience in C++ and various game engines while building projects to meet academic expectations.
- Developed familiarity with software development life cycle and collaborative tools Git and GitHub for version control.

Projects

Farm Defense March 2025 - May 2025

Role: Lead Programmer / Sole Developer

- Designed, Created and Coded a farming simulator, with tower defense elements.
- Developed most parts using code instead of Blueprints scripting to greatly improve proficiency.
- Built core mechanics using a mix of Blueprints and C++ including- AI Behaviors, A shopping system, UI and Game HUD and a plant growth system.
- Utilized GitHub for version control and project tracking, managing commits and tracking all changes independently to maintain organized, efficient development workflows.

FarmDefense

Polterguest August 2025

Role : Programmer, Build and Release Engineer

- Designed & implemented a CSV-driven interaction system for dialogue before migrating to Godot Signals.
- Developed the character customization functionality with live previews
- Owned the full build & deployment process and produced release packages for desktop platforms.
- Collaborated with designers, writers and other developers to iterate on UX, incorporating feedback and improving player experience

Project Page - Polterguest

GOAP Plugin Documentation May 2026 - Current

- Made comprehensive, technical documentation for a GOAP plugin in Unreal, covering architecture, setup, usage examples and API.
- Documented the necessary systems, tools and references to ensure onboarding was as smooth as possible.
- Wrote a clear setup and usage documentation for custom tools and classes.

Documentation Link

Volunteering

Tech Conferences February 2025 - April 2026

- Volunteered at two major online C++ conferences (CppOnline and ACCU), supporting attendees in navigating the virtual venue.
- Improved attendees experience by providing timely guidance on session locations and conference platform navigation.
- Proactively engaged and communicated with participants to answer questions and relay important conference information, enhancing overall attendee satisfaction.
- Resolved technical and logistical queries during live sessions, including personally escorting attendees to the correct virtual rooms.
- Collaborated with conference organizers and fellow volunteers to maintain a welcoming and informative environment throughout the events.

Certifications

Beginning C++ Programming - From Beginner to Beyond April 2025

Tim Buchalka's Learn Programming Academy, Dr. Frank Mitropoulos

C++ Programming Certificate

Certificate Of Achievement - Programming Track Develop At Ubisoft May 2026

Ubisoft

Certificate

UEFN Student Bootcamp August 2026

Unreal Engine

Certificate
