Skills

Programming Languages	Frameworks	IDE Tools
C++, C	SDL, ImGui, libtcod, nholmann/json, GBDK	CLion, VSCode, Visual Studio, PyCharm, JetBrains Rider, WebStorm
Game Engines	Programming Concepts	Critical Thinking
Unreal Engine 5, Godot, PICO-8, RenPy	OOP, Modern C++, STL, Data Structures and Algorithms, Memory Management, Design Patterns, Error Handling	

Git/Github

Experience

Ubisoft	Remote
Programmer Mentee - Develop At Ubisoft	Nov 2025 – May 2026

- Selected from competitive, global applicant pool for AAA-studio programming mentorship.
- Under mentorship of senior Ubisoft engineers to develop C++ / gameplay-engine skills.
- Built GOAP and Utility AI systems in Unreal with Blueprint-configurable goals, actions, and scoring for designer-friendly behavior authoring.
- Implemented gameplay and UI systems including inventory, crafting, routines, object pooling, managers, inventory UI, crafting UI, and a hotbar system.

Independent Work	Remote
Plugin Development	May 2026 - Present

- Independently developed and published a free Unreal Engine plugin based on tooling techniques explored during the Ubisoft mentorship.
- Designed the plugin to be designer friendly and modular, with extensive documentation to make it easily comprehensible.
- Gained hands-on experience with Unreal Engine plugin architecture, and a newfound love and appreciation for reusable systems design through my independent development.

Education

Norwich University Of The Arts	Bachelor Of Science • Grade 2: 1
Games Development	September 2022 - July 2025

- Gained practical experience in C++ and various game engines while building projects to meet academic expectations.
- Developed familiarity with software development life cycle and collaborative tools Git and GitHub for version control.

Projects	
Farm Defense	March 2025 - May 2025
Role: Lead Programmer / Sole Developer	
• Designed, Created and Coded a farming simulator, with tower defense elements. • Developed most parts using code instead of Blueprints scripting to greatly improve proficiency. • Built core mechanics using a mix of Blueprints and C++ including- AI Behaviors, A shopping system, UI and Game HUD and a plant growth system. • Utilized GitHub for version control and project tracking, managing commits and tracking all changes independently to maintain organized, efficient development workflows.	
<u>FarmDefense</u>	
Text-Tiles	July 2025 - Present
Role: Lead Programmer / Sole Developer	
• Developed a custom C++ game engine inspired by Twine and text-based games integrating SDL3, OpenGL, and Dear ImGui for real-time UI rendering and tools. • Implemented a fully functional menu bar system with callbacks for file operations, project saving/loading, and application controls. • Applied modern C++17 features, including smart pointers, std::filesystem, and lambdas for streamlined callback registration. • Implemented icon loading and window branding via SDL surface handling and resource management.	
GOAP Plugin Documentation	May 2026 - Current
• Made comprehensive, technical documentation for a GOAP plugin in Unreal, covering architecture, setup, usage examples and API. • Documented the necessary systems, tools and references to ensure onboarding was as smooth as possible. • Wrote a clear setup and usage documentation for custom tools and classes.	
<u>Documentation Link</u>	

Volunteering

Tech Conferences	February 2025 - April 2026
• Volunteered at two major online C++ conferences (CppOnline and ACCU), supporting attendees in navigating the virtual venue. • Improved attendees experience by providing timely guidance on session locations and conference platform navigation. • Proactively engaged and communicated with participants to answer questions and relay important conference information, enhancing overall attendee satisfaction. • Resolved technical and logistical queries during live sessions, including personally escorting attendees to the correct virtual rooms. • Collaborated with conference organizers and fellow volunteers to maintain a welcoming and informative environment throughout the events.	
Amir Satvat's Games Community	August 2025 - Current
Remote	
• Supported community engagement and brand representation for an online space of 14.6K users. • Coordinated with moderation and admin teams via JIRA to plan initiatives, manage user feedback, and execute campaigns. • Attended and contributed to team meetings focused on community growth, outreach, and policy development. • Handled moderation, conflict resolution, and event planning with a focus on inclusivity and audience satisfaction.	

Certifications

Beginning C++ Programming - From Beginner to Beyond	April 2025
Tim Buchalka's Learn Programming Academy, Dr. Frank Mitropoulos
